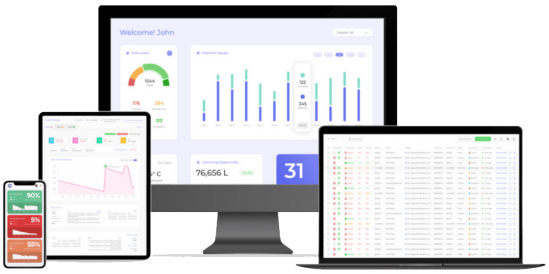
Benefits of having a FuelWatch Monitor®

- Monitors your fuel consumption at all times
- Notifies you by text or email when your fuel level drops below your chosen low level alert
- Re orders your fuel directly with your fuel supplier
- Detects any unusual drop in your oil level which could be the result of a leak or theft
- Provides you with a full consumption report



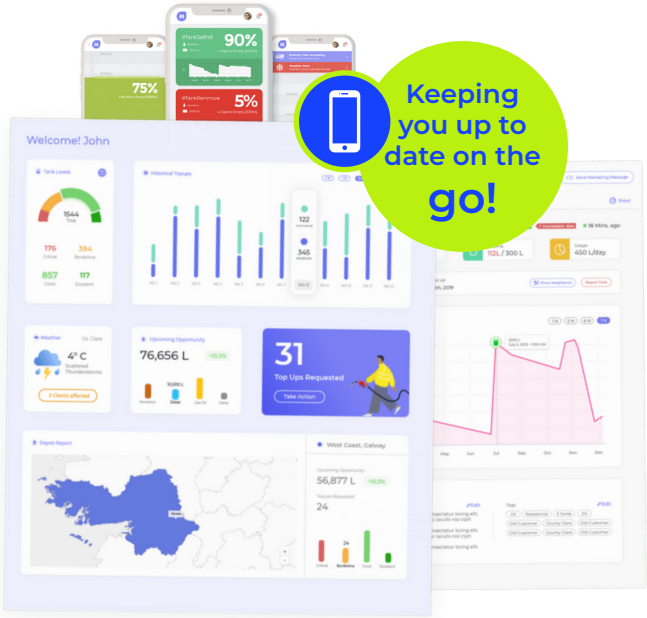
- Quick and easy ordering
- Fuel level monitoring
- Anti-theft & leak alarm
- Full consumption reports
- Notifications via text and email
- Re orders your fuel directly with your supplier

FuelWatch Monitor®

Monitor your daily useage through our online **system / app**

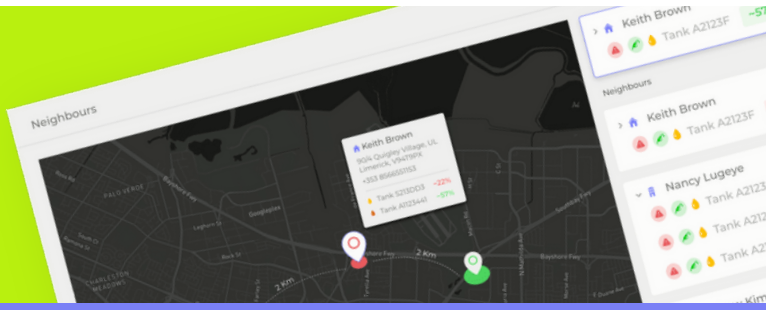
By monitoring your daily consumption and linking your device with Ukay fuels, you can control your fuel costs by avoiding emergency delivery charges, returned product fees and forecasting your usage.

All consumption reports can be accessed via the Magnus app or the website portal which sends low level alerts directly to you, reminding you when you need to order.



For a cleaner, greener future purchase your FuelWatch Monitor **today**

Lets help each other with our neighbours feature.



The fuelwatch app provides you with monitored level data at your fingertips from any time and place.
